

WHY YOUR MEDICARE DECISIONS MATTER...

Gary didn't review his plan options when he signed up for Medicare.

Gary is **stuck** with high out-of-pocket costs **for life.**

Like many people, Gary was exposed to a lot of advertising about Medicare plans. Gary recalls seeing one commercial in particular. "It offered coverage for zero dollars in monthly premiums plus free dental coverage and gym membership," said Gary. "It sounded pretty good, so I signed up." Unfortunately, he did not take the time to understand how this coverage worked.

*If Gary had just taken the time to understand all of his Medicare coverage options, **he could've saved \$4,000 each year in out-of-pocket costs.***

Gary is a chronic diabetic. On average, he's hospitalized two to three times per year. He sees specialists frequently and often has out-patient procedures. With his healthcare needs, Gary is now stuck in a type of coverage where he pays about \$3,000-\$4,000 more per year than if he'd selected a type of plan better suited to his needs.

HOW MUCH COULD YOU SAVE?

In most states, after your initial enrollment into Medicare, you can become locked into a type of coverage that may be less than ideal for your unique, changing needs. Be sure you understand the good—and bad—of each of your options and choose the coverage that is in your best interest, both for today as well as in the future.
