

## WHY YOUR MEDICARE DECISIONS MATTER...

Lynn didn't want to review her Medicare Part D drug plan.

Lynn almost overpaid for her medications by **\$36,100.**

Lynn turned 65 in November of 2016. In preparation for her birthday, she spent countless hours learning about Medicare. After completing her enrollment, Lynn was excited to "forget about Medicare for a while." However, it was also Medicare's Open Enrollment period. This meant that, although Lynn just signed up for Medicare, she should review her coverage once again to ensure that her new plan would still provide the best coverage for her needs in the coming year.

***She was incredibly glad she did...***

**By comparing her plan options during Medicare's Open Enrollment Period, Lynn saved over \$36,000!**

For Lynn, her Part D plan was dropping *just one* of her brand name medications from its formulary. This change meant the difference between paying \$42,000 in out-of-pocket costs versus just \$5,900!

## HOW MUCH COULD YOU SAVE?

*Each year, Medicare plans change drug formularies, provider and pharmacy networks, deductibles, copays, and more. **Just one change could literally cost you thousands.** Annually between October 15 and December 7, we can help you ensure that your Medicare plan is still the best one for you in the coming year.*
